

1.07 The Role of the Cookbook in Relation to the HLURB Previous Mapping Guidelines (Volume 7)

Although it is advantageous to use GIS in the preparation of the CLUP (and many other related activities of the LGU), some municipalities/cities may not be able to acquire a GIS system in the immediate future. In this case, the previous CLUP Guidelines Volume 7 ('Mapping') is still available for use to guide users in manual mapping activities. However the GIS Cookbook's recommendations for conventional data management and the appropriate templates will still be useful.

Relevant parts of Volume 7 are found in the Toolbox, Chapter 9.
